

# WL10

The AIMWIN WL10 compact tactical light is specially designed for pistols. It uses UHi 20 LED, up to 900 lumen brightness output and crystal bright electroplating technology combined with PDOT digital precision optimization technology to create an optical system. Powered by a polymer lithium battery, the battery life is up to 1 hour and 15 minutes. Magnetic battery charging, convenient and easy to use, compact body design, ultra-light and portable, and built-in ATR temperature control module, impact-resistant design of the lamp body, dual-button design at the tail, high-efficiency constant current circuit, constant brightness, in line with IPX6 protection standard and 2-meter drop resistance. Made of durable aerospace-grade aluminum alloy, the surface has been treated with wear-resistant military grade three hardening.

### Dimensions

### Package List

- Li-ion Battery
- Magnetic Charging Cabl
- Picatinny Rail Adapter
- Wrench
- Screw x 4

## FEATURES

### COMPACT TACTICAL LIGHT

Quick Release Battery

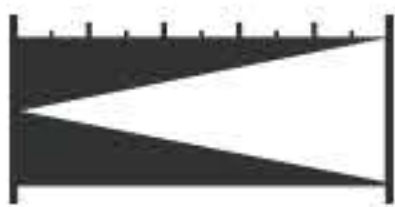

Compatible With Glock Picatinny Rails

Aviation-Grade Aluminum Alloy

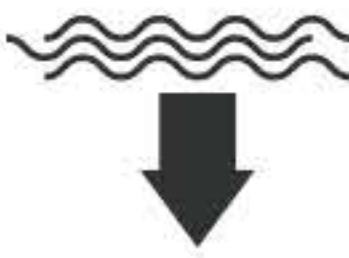

900  
LUMENS

255M  
MAX DISTANCE

16000CD  
MAX INTENSITY

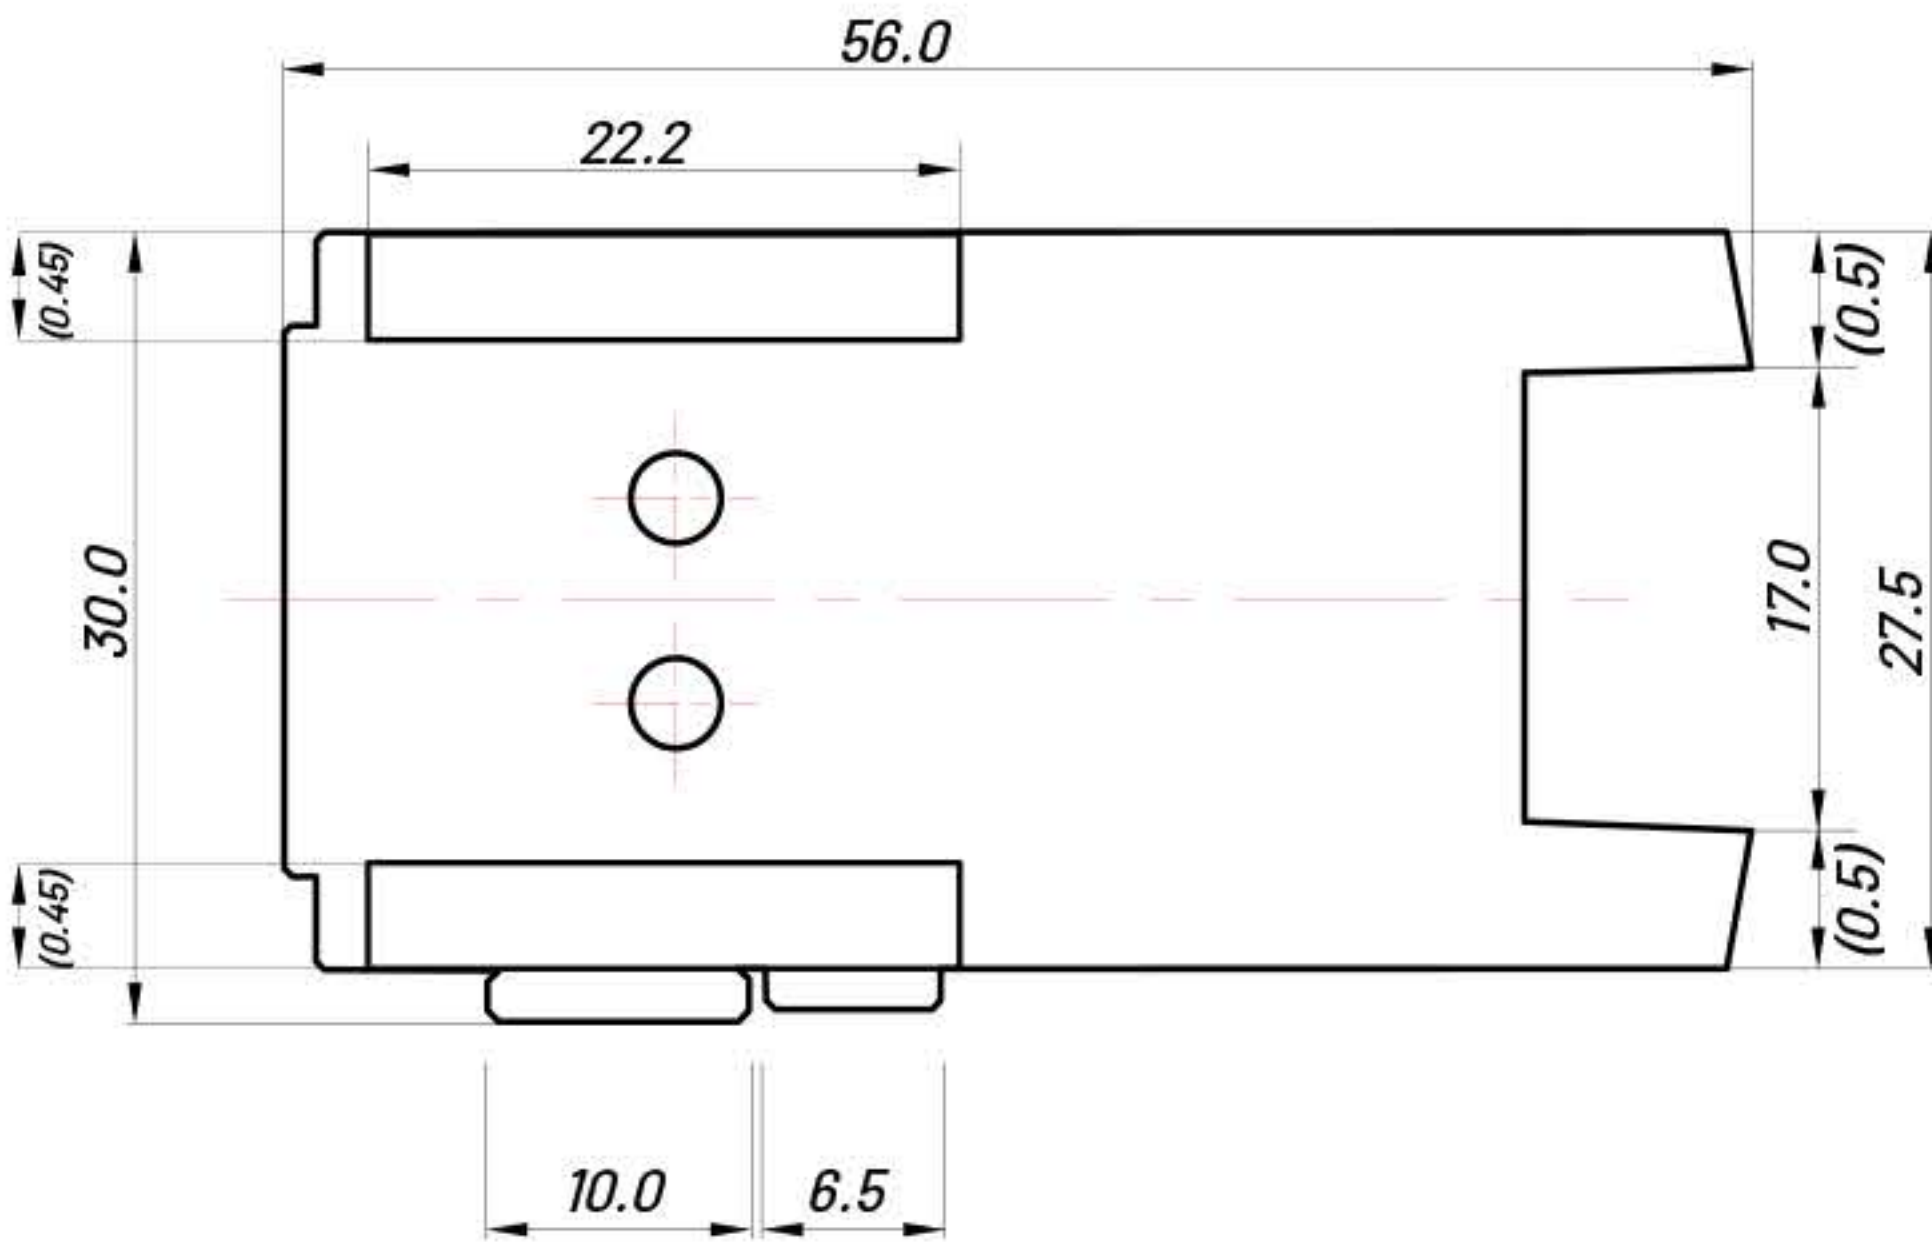

IPX6  
WATERPROOF

2M  
IMPACT RESISTANCE

1. Utilizes a UHi 20 LED with an output of 900 lumens
2. Max throw of 255 meters
3. Peak beam intensity of 16,000cd
4. IPX6 Waterproof and dust proof rating
5. Impact resistant up to 2 meters

Footprint

## SPECIFICATIONS

Output	900 Lumens	Dimensions	56.0mm × 33.0mm × 32.0mm (2.20" × 1.30" × 1.26")
Max Distance	255 Meters	Weight	49g / 1.73 oz (without battery) 66g / 2.33 oz
Peak Beam Intensity	16,000CD	Housing Material	Aviation grade aluminum alloy
		Surface Finish	Military standard Type III Hardcoat Anodized
Built-in	(ATR) module	Operating Temperature	-40°C~60°C (-40°F~140°F)
Battery	Quick Release Battery 500mAh Li-ion Battery	Water Resistance	IPX6
	Magnetic charging		
Max Runtime	1h 15min	Impact Resistant	2 Meters
